the State.

Histana Mout, May It.—Specials from a number of the important points in the teartitory show a generally light vote and little integrets manifested in the constitutional election. There are twelve delegates to elect from the Helena district. It is known now that the republican have elected five, among them ex-Governor Carpenter and Hon L. H. Hernfield and the democrate four, including Maginness and ex Delegate Toole. The chances are in favor of the democrate carrying the other districts—two out of three—making a term Reports are stragging in from the various poling places and no reliable estimate can be made now. NORTH AND SOUTH DAKOTA. The Democrats Given a Representation of One-Third in Both Sections.

One-Third in Both Sections.

Sr Paul, Minn May I. — The election in South Davota to-day was for or against the Slopy-Falls constitution upon which the omnibus bill required another voice, and for the election of delegates to the convention at Sloux Falls to complete the work to be done before the presidential proclamation of statehood. The vote to-day was light but the majority in favor of the constitution was overwhelming, while of the delegates elected to the convention there have been two republicans to one demberat, that division having been agreed upon before the election.

In North Dakota, the delegates were elected to the constitutional convention, which will convene at Sismarrk on the 4th of July Here, as in South Dakota, the minority party (democratic) was given one-third of the delegates.

IN WHICH THE LATTER IS WORSTED

Farry an Unconcerned Spacetator of the Meles Between Her Husband and Hot Paramour

NEW YORK May 14.—A special from Paris says:

New York May 14—A special from Paris says; Another chaper was enacted yeaterday afternson in the case of Cinton Berry, the Tacoma millionaire, and his wife who were trought before the public recently by reason of Mrs. Ferry's relations with a dry goods clerk. Yesterday afternson, and the Rue Beribe Ferry mot Le Clerc, whom he charges with undue intinacy with Mrs. Ferry, when a street fight ensued.

An agreement had been arrived at on Saturday last between the injured husband and his wife whereby it was arranged that a divorce should be asked for by the husband solely on the ground of incompatibility of temper and that the more serious charges should be dropped.

The events of jesterday however will probably reopen the matter. The Misses Ferry, one of whom is a daughter of the present Mrs. Ferry, were calling at the office of their father's lawyer in the Rue Sertle where they were seen and tollowed by Mrs. Ferry accompanied by Salexana Le Clerc and her young son Cluton who according to the areangement made on Saturday was to be allowed to remain in Mrs. Ferry's charge for ten months of the year. The young ladies were waiting upstain, whither Le Clerc kept sending them mersagers, asking them to come down as he wanted to apeak to them. The young ladies became frightened and sent for their father, who was making a call at a neighboring hotel.

On his arrival Ferry found his rival standing on the stairway of the lawyer softice with his young son Cliuton in his arms. Ferry ordered the aslessman away without effect and the war of words brought on an interesting contest. Tacoma folsas would have been moved to admiration to see the way in which their townsman sight hand re-

son Cliuton is his arms. Ferry ordered the salesman away without effect and the war of words hought on an interesting contest. Tacoma folias would have been moved to admiration to see the way in which their townsman a right hand retained its cunning, despite his to years and his close attention during the last decade to higher and gentler erts in five minutes the "young in a windons were closed and his claret was tapped while the 'old nu' had only a few scratches and was fighting in fine form. In the last town, however, the years assessman got in a savage blow with his brany boot, which fractured Ferry s zib.

The police who to the number of a dozen had been kept off by the crowd, now rushed in and the two antagonitis were dragged off to the police station in the flue de Province, where each preferred charges of small segminst the other. Both were finally dismissed.

The most serious and unique feature of the fight was the calm and indifferent manner in which Mrs. Ferry viewed from her hansom cab, the streggle between her husband dejore and her husband defacts. In the evening Ferry was feverish, but the doctor stated that he did not think his broken rib would occasion him serious trouble. Ferry stated that he did not know as yet how the fight would change the aspect of the divorce case, but thought that he saw him with his child in his arms. "Against the savies of my friends and against my better judgment," said he, 'I allowed my wife to keep the child. I thought it would give her a better chance to lead a good life."

San Francisco, May 14.—The walkers at the Mechanics Parillon in the six days go as you-please race were looking very weary this mornplease rare were looking very treating.

One of them, imping along the sanduse circuit with swollon feet and an againsted look, said that his manager would not period the to retire.

Kint quit early this morning, saying he would walk no more.

Klatt quit early this morning, saying he would walk no more.

Howarth, who retired yesterlay, left but eight men on the track, two of whom are clowns.

The race has dwindled down to a contest hetween Alhert and Ouerror, and unless some accident happens to the former he cannot fail to win the first prize. At noon Albert was thrivesit miles ahead of Guerrero, and was looking even fresher than yesterday. At noon he was torting around the track with a cane in one hand and a bar of ice in the other, from which he occasionally took refreching albibies. Ho rested five hours last night, which is the largest respite be has so far taken.

ANYING THACK.

The work of laying track from Eunnyside to Mount Tabor, on the Wilamette bridge railway line, was commenced last Friday, and up to year terday the from had been laid to the Edendale tract, a distance of about one quarter of a mile from the place of beginning. A few clear working days will suffice to carry the work to Mount Tabors ot that the company may keep list promise and commence making trips to the clevation in June. The new mator line is in operating condition, and takes up three loaded cars without any trouble. This line without doubt promises to be a very popular one. From the summit of Mount Tabor there is no grander scenery in the world, and hundreds will go there every Sunday on the completion of the railway. One can stand to-day on some point that is sufficiently clerated to overlook the country for a quarier of a mile on each side of this railway, and can see no less than 100 houses. All this is the legitimate result of suburban railways. ENTERIALNMENT TO MORROW EVENING.

ENTERTAINMENT TO MORROW EVENING.

The ladies of St. David's guild will give an entertainment to-morrow (Thursday) evening at Armory hall, corner Fourth and N streets It is described as a "Grandmother's Tea and Fanry Fair" and will embody some novel features which cannot fall to please an invest features which cannot fall to please the conditional form of the please of the pleas

A canvass will be made at once of the business men and properly owners to secure funds with which to sprinkle the principal streets. If sufficient encouragement is received, the particular have the matter in hand will purchase studebaker improved sprinkler, which will cost \$4.9, and proceed with the work as soon as may be desired. It is expected that a sufficient amount in monthly subscriptions may be rulsed that will insure the success of the generotic. It might be that the city council could be induced to make a small appropriation to the scheme.

PRITING IN EXECUTED LIGHT. PUTTING IN ELECTRIC LIGHT.

The dynamo that will furnish the electric lights for Duniway & Co's, extensive lumber 1 and at the foot of J street has been put in position in the en-STRENGTHENING BRIDGES.

STRENGTHERING BYINGE.

The bridge over Sullivan's gulch will be made more secure by the addition of more bents undettee railway. This has been made necessary by the leavy motors that have just been received by the Portland & Vancouver Railway Company. These motors weigh twenty-two tons, and inst much heavier than the first one received. Work was commenced on Sulivan's bridge yesterday. All the weak points along the road will be made scenire.

It has been reported by quite a number that where Tweltth street is crossed by the O. & C. where Twellth strent is crossed by the O. & C. railroad, the road is almost impassable, and should be regalred at once. This strent connects with the Powell's valley and Milwaukie roads, and there is a heavy travel over this had place if should be looked after at once by some time. This place has been out of repair for some time.

TENT BLOWN DOWN.

During the heavy wind that prevailed Monday afternoon, the large andience tent on the Adventist's camp-ground was blown over. There was no one injured by the needlent. None of the small tents were disturbed. The large tent was again set up yesterday.

The Professional Homesteader.

Onthe Re

I met a professional homesteader to-day in Sioux county, the extreme northwest county of Nebracka. He stood by a praint schooner out of which came a stoye-pipe. Behind was a cow and cult and two dogs.

Where is your home? I asked.

"H'nt got no house," he said, as he kicked one of the dogs and took a chew or tobacco. "Where do you live?"

"Where do you live? "I excelaimed, indignantly. I don't have to live any where. I'm marchin' a head of civilization, sir. I'm homesteadin'."

"Where do you sleep?"

"Sleep? I sleep over on the government land, drink out of the North Platte, eat jack rabbits and raw wolf. But it's gettin' too thickly settled round here for me. I saw a land agent from Buffulo Cap to-day and they say a whole family is coming up the North Platte fifty miles below here. It's gotting too crowded for me here, stranger. I leave for the Powder River country to-morrow.

Constitute or Liver?

Cinciannal Commercial.

A distinguished physician once said that the fearful sensation he found afflicting some of his patients who had been negligent of their religious duties were very rendly removed by the operation of a seidlitz powder next morning after the administration of five or six grains of hue mass, freshly rubbed up by a reliable apothecary. Because, you see, "heaviness of heart and spirits-criminality excepted—result from inactivity of the hver, which many mistake for a quick-uning of the conselence, and, therefore, lunging that they are under spiritual condemnation, while, in fact, they are only struggling with a load of effete matter that is easily removed by a judicious dose of honest medicine."

The quaint cluster of Caue Cod towns, including Denns, 'Yarmonth, Barinstable, Sandwich and Bourne, had they been as smicably inclined as such a group should be, might have celebrated their 250th anniversary this summer. But when the question of locating the unique observance came up for discussion, there was a feeling of discord, and this week these towns—Bourne and Sandwich excepted—have voted to postpone the celebration another bulf-century. This magnifeent property comprises 1400 lots and lies immediately between the city of East Portland (population 12,000) on the south and the city of Albina (population 4000) on the north, being really a "reserve" between two populates conters with a combined population of States. Thiousand. It is high, commanding a view of the entire cities of Portland, East Portland and Albina and is reached by the street cars of the Willamette Bridge Railway Co. from either Portland or East Portland. This company is now operating two lines of street cars, one running north from Holladay's addition, through the heart of East Portland, across the Morrison street bridge, and the other running due west across the new steel bridge, both lines terminating in Portland. In addition to these two lines the cars of the Vancouver motor line run directly through Holladay's addition from north to south. The property can also be easily reached from the "west add" by either the Southern Pacific Railroad Company's steam ferry or by the small ferries running from Portland to Albina. Some of the finest residences on the "east side" are located in this addition. Many of the most prominent residences of Portland and East Portland are now purchasing property in Holladay's addition and many elegant and substantial residences will be constructed there during the coming year. A magnificent Boulevard, Holladay avenue, 100 feet wide, cuts through the entire property from west to east, and is now one of the most popular drives out of the city. This connects with the new steel railroad and wagon bridge (spanning the Willamette) on the west, thus giving easy access into Portland from this most desirable property. Address or call on

SNELL HEFTEHU

Asimple explanation of the railroad con-treversy of which our dispatches from New York gave an account yesterday, is found in the fuct that a long effort has been made to control the O. R. & N. system in the interest of the Northern Pacific, through the pirati-Transcontinental; and the attempt to \$10,000,000 more of O. & T. stock and to give that stock a preferred character is the final coup resorted to in the hope of accom-

plishing the object.

It is not probable that in the whole history of railroad wreking a more high-handed proceeding was ever ottempted. If it could succeed it would virtually destroy the value of the \$49,000,000 of G. & T. stock now outetock in hands that would use it to perpetu-ate the power that this "master stroke" had

gained.

But it does not appear possible that the attempt will succeed. It is one of those expedients that defeat their own object. This have any standing in law, because it would have none in common honesty. It would seem that a proceeding so high-hunded never reasonable assurance among the Villard party that they could get control of the O. E. & N. through the O. & T. in a regular or ordinary way. The O. & T. does, indeed, control a majority, or at least an even half, of the stock of the O. H. & N.; but now the the purpose of controlling other corpora-tions; and therefore the right of the O. & T. to vote its large holdings of Or R. & N. is contested and probably will be denied. It would seem as if this had been foreseen by had been taken to meet this emergency, white the expedient of giving the new stock a preferred character and of assuring to it a dividend of 6 per cent, was employed as the only available device for taking the earnings of the O. R. & N., whose stock is the only cash paying asset of the O. & T. This action emphasizes the necessity of

proceedings at law to strike at the very existproceedings at law to state as the voly library ence of this illegitionate and piratical cor-poration, the Oregon & Transcontinental. The use of it as a means of controlling other corporations should be, and henceforward, very probably will be, contested and resisted at all points. The proper thing for legiti-mate stockholders in the O. R. & N. to do is to contest the right of the managers of the reasons could be presented to accourt sufficient to bring about the appointment of a receiver for the O. & T., with a view to dis-sibiliting its excets, and winding up its affairs plainer than the fact that it is contrary to public policy to allow its existence to con It is an instrument of jugglery and to-use it as a means of controlling one system of railroads in the interest of another, and of apriving the people of a vast region of the glumate benefits of independent and efficient milway service. To this end its manugers do not stick at a scheme to violate the laws of the state under which the corporation exists, and eyen to swindle their own stockholders. It is high time to strike at this robber corporation, and to strike to kill.

FACES AND FINANCE.

How long the Oregon legislature will be terrorized by a few cranks who pretend to know what is good for the state and have compelled legislation against capital, is a question of some fit ancial importance. The range contained some men who did not orrow, and determined that no others should; so we see mortgages and all credits so taxed that millions of money have been chiven out of the state and other millions prevented from coming here. The fact that money and mortgages and all ored is are taxed so much more than other property has kept interest high and has restricted en-

a common basis, money would be far more abundant, and interest lower. The result would be abundant capital at 6 per cent, and many emerprises would be prospering energy could make his way well enough if he could horrow at 6 per cent, who can not capable of improving opportunities and inning success on horrowed capital. The state needs such men, and their prosperity would benefit the community around them, scap money is a very capable tool, and

napoint ease and certainty. out borrowing and denounces all money lending on that account, has held a whire over the legislatures of Oregon, and proposes to use the lash if capital comes in question. This thing has gone on for years, and it is to be hoped that one result of the great influx of new-conters will be to enancipate our state from this bigoted rule, and estab-lish a better and more liberal policy of taxation. It is humiliating to have to confess that Oregon has so long rumintained a nar-row and contracted policy that other states have only attempted for a brief space, and have discarded as unreasonable and unfit for the age in which we live.

THE BL. CKEST CRIME.

There are crimes and orimes and crimi-tals and oriminals in the world. The utter-most depths of the former have been sounded by the foniest and most degraded of the latter in the commission of the revolting deed for which Frank Jarvis now awaits the investigation of the grand jury of this emanty, ander bonds of \$3000. The spectacle of a delicate woman, arising in court with an infantin her arms, to testify against her dwn father for incest, is one which, happily for the credit of humanity, is not often wit-

On the same day in which this most revolting scene was spacied in one of the jus-tices courts in this city, a man was deliber-stely shot to death upon one of our public streets, and for this violent and unlawful streets, not for this violent and unlawful deed his stayer lies in jail awaiting trial for his life. Reprehensible as was his act, and memoring as such acts are to the safety and peace of the community, it is exceeded a thousand fold in acrosity and shameless deflueration by the crime charged upon the dather by the frail daughter, who with tear-stained checks recited hast Saturday before the court the story of her cruel and wanton debasement. Had he murdered the girl the law would have scienning and in the name of justice declared his life forfelt, and its executors would have been charged with the duty of seeing that the forfeit was duly paid. He has made the Me which the law venerates and protests an abiding misery, a bitter shame and a lasting curse, and justice, while she will her eyes with shame and horror, is

Such a seoundrel ought first to be emason-lated and then withped to hard latior all the remaining days of his life.

HERE AND THERE.

There is no part of the Union where the conditions are so reliable and the certainty of harvests so sure as on the North Pacific. California suffers from unfavorable seasons, knows years of drouth and has spells of hot and dry north winds that destroy vegeta-tion, walle Oregon, with its more reliable ruinfall and more equable seasons is bless with an average certainty of harvest. But Californik is far more favored than the average West, and the Pacific shore, as a whole, possesses higher claims to the confidence of griculturists than any other part of the

The people of Kansas, Nebraska, Minue-sota and Bakota suffer extremely from the seasons and lose crops by various peets not known to us. They endure terrible suffer-ing from storms, and nature seems to very in extremes from beneficence to severity. that will make them long for the blessings of climate and soil we enjoy when they can be made to believe the reports that reach them are trustworthy. It is not easy to overstate the advantages of this section, but it is very impolitic to attempt to prove that Eden-like perfection characterizes everything in nature and circumstances here. There are diffi-culties to surmount; there is hard work to do-though nature does assist man by greater certainty of seasons than is known to most other regions. There is enough in that fact, without attempting to prove that there are no vicissitudes to be met and no

disappointments to incur.

The year 1888 was exceedingly favorable to present year promises fully as well, and not crops are assured, even if there should not be any further rainfull. The abundant harvest that seems to be promised for 1889 will strengthen the prosperity of the country, both east and west of the Cascades, and make the general condition of producers as favorable as they could ask. It requires no bonstful eulogy by those who

have made their bears bear in the past to show newcomers that they have reached an excellent sport of teath. They can see for themselves and realize from the conditions surrounding them, and the general presperity that prevails, and need my telling, I they ask a farmer hardlog since he had a failure of crops, he will be puzzled for an answer, but may suddenly remember that ten years ago a warm July rain fell and turned to rest thousands of series of spring wheat that was near ripening. This partial failure is the only one known is ice the set-

Our farmers are learning bet er methods and practicing improved agriculture, because it pays to do so. In earlier years, when any ordinary cultivation secured the best possible returns, they were careless, but now are working for the leat possible results for their labor and capital. The newcorner is some-times surprised to find in our state a higher socialition of social and agricultural life than he left behind him, but so it is.

A MISTAKE. The discourse delivered by Bashop Potter of New York, on the centennial of the constitution, bus attracted a good deal of atten in a tone of mingled lamentation and passimism. In Rishop Potter's judgment the of the present day with that of 100 years ago makes a bad exhibit for the present day. We think this a mistaken judgment. The bistorical records of our country abundantly historical records of our country abundancy prove that in Washington's time there was far less of public spinis and of public virtue than we find to-day. Disinterested patriotism was aid, low gib in the days of "the fathers." Politicians were even more unscrupulous then than they are now, and we have at the present day no such degree of partisan ranger and politica obscopity as prevailed then. And our great war has proved that the men of this day are ready to make sacrifices for country which would have appalled the men of 100 years

ago.
In every country and in every age there and despair over the degeneracy of the times. These jereminds may have their uses as exhortations to those who hear them, but they have not a basts of truth. That is, they are false in their assumption that public morality and public virtue are when it can be commanded, more prosper.

The temperament of the speaker and his point of view have much to do with producing these pessimistic conclusions. In the city of New York there is indeed little patricity of New York there is indeed little patri-olism, and Marrmon leads ignorance and vice; but the city of New York is not the type of the country. As the Chicago Tribune well says: "It would do Bishop Potter good to get nway from the missmathe and depress-ing political influence of New York city and make a visit to the Northwest when the next occasion for patriotic celebration comes around, catch the breath of the prairies and mountains, cheer up and renew his faith in the American people. Long-dwelling in the wile, dislayed state-soversienty atmosphers of New York is shough to change any patriot into a pessimist." During fifty years the city of New York has been profoundly disloyal to the principles of American unity and freedom. It sympathized with and supported the slaveholders' rebellion, and na-tional troops had to be sent from the front in the very agony of the straggle to overawe and suppress its dislayal element and uphold the authority of the United States. Its mamicipal government is rotten through and through; its controlling forces are throughly mercenary and corrupt, and for half a cen-tury it has not cast a vote that has not been

IN THE INTEREST OF OLD MAIDS. Denmark has a new and unique organiza-tion called the "Celibrey Assurance Society," the object of which is to provide for women who cannot marry or do not choose to marry. I'remiums begin at the age of 15 and end at 40, the unmarried policy-holder at the latter age receiving a life abundity. If a member marries at any time after taking out a policy she fortelts all chain upon the society. The profits of the institution from this source are

of its members as never marry.

It would be of advantage to a worthy, hon-It would be of advantage to a worthy, hon-orable and self-serificing class of women if this, or some other device looking to a simi-iar object should become popular and suc-cessful in this country. Thanks to the grow-ing independence of the uge, and the on-largement of the sphere of woman's labor, which is one of the most nota-ble features of its progress, the typical "old road," described "as a silent, thought-ful woman was shuffles about her sister's or miltri-lay's kitchen in scrimped raiment,

alternately feeding the children and the fire soil acrubbing the floor for positine, conditions that fure internation of the relatives who so kindly not seriously urged, adding, "such little and charitably shelter her, he but a sight equivalent for her board and second-hand lated." clothing, belongs to a byzone era. Indeed, she has never been a distinctive feature of the great West, partly from the relatively greater opportunities for marriego that it has afforded to woman than were to be met in the East, and partly from the spirit of independence that its widening prospects have inspired. Still, there are women who, from commendable motives, have remained single, toiling for dependent ones, and by reason of having to provide for those unable to lay up a store for the winter of life for themselves. Sensitive, leval to duty, keenly conscious of the deariness that attaches to the word "homeless," old maids of this class are objects of the sublimest sympathy. They shrink from pity in its common form and if pressed upon them they spurn it: but they inspire in the few who understand their notives and feelings the most pro-found respect. Philanthropy and thrift might well combine-to-organise a society—the benefits of which would accrue to such women, as a surety against possible want after the active years of life are behind

It is stated that the men who are here from Scotland to look into the condition of the Scotland to look into the condition of the marrow gauge, railways are very lavorably impressed with the outlook and opportunities, and are disposed to recommend that the owners hold on to the property, put it in repair, pay its debts and build a line into Portund. The Orzeonian is entirely confident that this would be an excellent stroke of business. A line from Portland to Silverton could take a route that would give it a larger land through the southern part of valley, and thence across the Clackamas and Motalla to Silverton, it would traverse a fine country; and this would complete for the company aroad throughout the whole length of the Willamette valley on the east side, at a sufficient distance from the river and from the O. & C. to give command of a wide scope of country. For the west side some ar-rangement could be made with the road now in operation from Portland to Dundee, or otherwise. It is probable that an expendiconvert the narrow gauge system into a good paying property. The country needs the road and a fine opportunity invites the com-

Pire culture of sugar beets, which is being experimented upon in some parts of the state this year for the first time, is looked upon with much interest by farmers who are anxious to diversity their crops. It may be interesting to these to know that those who tried the experiment in California last year pleased from \$40 to \$50 an acre on their crop. They found a market at the beet sugar tory of Claus Spreckels at Watsonville, which, during the sixty-one days in which it was running, died over 14,000 tons of beets and produced 1640 tons of sagar. The propriester of the factory made a net-profit of 5 percent, on his investment and has doubled the capacity of his plant this year. The soil and climate of Oregon are exceedingly favorable to the growth of angar boots, and when this has been demonstrated thoroughly it is not unreasonable to expect that capital may seek investment of this kind at some suita-ble location in the Willamette vailey.

The ephemoral enthusiasm that political rulers in the United States inapire was shown last week in the auction of the carriages, harbis protty young wife. Sale to say, the silver-mounted harness with the G. C. monogram brought but \$62 under the hammer, and the auctionsor cried himself hourse in the at-tempt to raise the figures of \$14.25 on a suit of elegant livery. Hobes on which the family monogram were emblaconed were rathlessly sold at less than half-price, the curious crowd evidently wondering what added value at-tached to the athletes on account of the com-pany which they had kept for a brief time. It is reasonably evident that Mr. Cloveland did not take much account of his second cash so recklessly in laying in supplies which events so soon rendered useless to

Preparations for the annual reunion of Oregon pioneous, to be held in this city on the 18th of June, are going forward quietly, with every induction of a large attendance, and a good old-fashioned meeting. A man has just been sentenced for life to the state's prison of Michigan for the nur-der of his mother. The imagination inbors in vain to conceive of circumstances au-ficiently extennating to save the perpetrator of such a crime from the gallows. One would suppose that the sympathy and flowers which it is customary for women to extend to the inmakes of felone cells in these days would be withheld from the author of an act so distantared as this, and that a criminal thus forsaken would stand some little chance of being punished as the law directs.

Rains have been general during the month, not only in the Willamette valley, but throughout Oregon and Weshington. The first showers were, haralided as timely, but farmers in all sections are now as needy for sunshine as are the women of the city, who are anxious to do their spring shopping, and the merchants, who are more than auxious to have them do it. Of course there is the usual talk about the crops being ruined, the early fruits spoiled, etc., but, equally of course, the year will be one of usual abund-

I do not hest ate to charge that the motive a sol these brutal and always unpunished murders of negroes is political. The colored race is to be kept subdued in order that the colored roters may not when election days arrive dar. to go to the polits and vote the resublean tacket. There is no other also pattern motive for all the outrages that are occur in, and recurring in all the bouthern sections where colored voters are numerous. The negroes are peaceable orderly and well dayoued and as a race do not endanger in the slightest degree the lives or properly of the white race. But they do wish to you the republican tacket-contrart to the wishes of the great body of whites. Therefore they are intimidated, tortured and slamptered and no one is ever punished for such offenses.

Griffin do Laig s a negro who is described as a stranger without money friends or influence was sentenced to be hanged for murder by Judgo Huddin at Bearriort, in June, 1887. The homicide for which be was arraigned was committed on board an excursion steamer on the way from Bavannah to Besufort, and he was forced to trial without a large settless and "settle only be."

The resolution passed by the Oregon & Transcontinental directors authorizing the issuance of
\$10,000,000 additional preferred bonds, afforded
railroad men a good topic for discussion yester
day Everybody salted about it and had an
opinion to express. All regard this action as the
prefinal party engagement of the great battle that
will be fought for the control of the O B. & N

THEY SERVED TO ACCOMMODATE MOVET 'When I was elected less Junc I understood very well that I was to hold office but a short time and I think the others who resigned had a similar understanding. The Vallard men had everything their own was but with them things were precitedly in a nebulows state. Origon was shilled to nine directors and they had to find nine suitable ones to gleet Colgate Host came to me and saked If I would not accommodate linm by sorving for a time until they could get on their feet I asked him how I should set and he told me that when any important action was to be taken I would recover instructions from Villard. I told him that If anything involving the interests of Portland sense up I would you to be indied the city or resign

players of the hurthern Parliff mare scheded in our places."
At the meeting heal last Friday the directors present were Meiers. Hansen, Fulton Smoon Bellinger, Hall and Bartlett. Mr. Charlton was out of town and Mr. Schulz, was in New York Jasses, change and Bellinger opposed the new flegal and bound on the ground that it was flegal and bound on the product of Portland. The other drestors voted for interesting for an injunction to prevent the issuance of the bounds. The resolution it is understood, calls on President Willard and the secretary to save the bonds and for that reason a prominent attorney believes that nothing can be done here. How you, it is possible that an injunction will be asked to prevent the new stock being yound at the Lection.

I have a cock was an interest of the company on a batter working basis and give it more funds. Whilstown to the Germany on the formation of the German capitalists whom he represents in the O E & N. Northern Pacific and offer companies. When the joint lease was off the button and Northern Pacific and offer companies when the joint lease was of the button and Northern Pacific began fighting. Neft they commenced building into each other's territory. Villard saw very clearly that this course would prove desse from to both companies unt so he are about to either the companies. The country of the control of the of the stocks had by him chains in the value of the stocks had by him chains of the control of the O E & N. Co has been gaing on for two years and I think villard is on top now He has control of the O I & N. Co without the new stock. He will also have the uppor hand in the Northern Pacific at the chection to be field in September and once more ht will be at the head of the rathroad situation in the Northwest. Again at the belin he will con additionally the head of the season of Fortland and selection to the control of the season of the rathroad situation in the Northwest. Again at the belin he will con additional the head of the rathroad situation in the Portland its share and the the Round its just portion. This talk about Villard beling a traitor to the city I think is groundless. PORTLAND WILL DELEBRATE,

The committee then adjourned to meel to-mor row evening in the council chambers.

It is always customary when so large a committee is appointed for a number of those whose services are of the mot value to decline on the plea of stress of time. When selecting the committee the people who have the lear, time were appointed as they can generally be it pended upon to fulfill their task at short notice. It is loped by the committee making the above as pointmen as it at no one will withdraw.

Charged With Infringement-Olds Waivon Examination-Ingalia Holladay Trouble-Application Denied-Cody's Case

A decision was rendered by Judge Deady vester-day in the United States district court in the case of the United States against the steamer City of Salem and R. Thompson her sacster charged with violating the passenger act by carrying more peasengers than allowed by law It was charged that the steamer had violated the law averal times on the Fourth of July last, but the suit was confined to one trip from Clinton & McCoy a base-ball grounds to this city on the evening of that day, at which time it was proven that she carried 23 more passengers than the law allowed As the penalty is \$10 for each passenger carried in excess of the lawful number the court gave judgment against the boat for \$2.50. A stay of excention for ten days was grauted, and an effort will probably be made to have the president remit the sine, or a portion of it but as by the law the fine goes to the informer it is doubtful if this can be done.

ABSOLUTELY PURE.

For oulek raising, the Royal Baking Powder is superior to all other leavening agents. It is absolutely pure and wholesome and of the highest leavening power 13 is always uniform in strength and quality and never fails to make light, sweet, most palatable and nutritive food. Bread, biscuits, muffins, cake, etc., raised with Royal Baking Powder may be eaten hot without distressing results to the most delicate digestive organs It will keep in any climate without deterioration.

Prof H. A. Mott, U S Government Chemist, after examining officially he principal baking powders of the country, reported :

"The Royal Baking Powder is absolutely pure, for I have so found it in many tesis made both for that company and the United States Government. "Because of the facilities that company have for obtaining perfectly pure cream

of tartar, and for other reasons dependent upon the proper proportious of the same, and the method of its preparation, the Royal Baking Powder is undoubtedly the purest and most reliable beking powder offered to the public, "Da. HENRY A. WOTT, PH D."
